

## The Preparation and Cut-In Appointment (Once the system has finished in production)

- Production times vary but most often take approximately 16 weeks.
- The hair system box will be mailed to the family's home, and they will call you to schedule the next appointment.
- **Review the Care and Maintenance training with the family.** Demonstrate the process and review each product contained in the box. An instructional guide will be included in the box for reference.
- **Cut-in** and style the hair system. Talk to the child/teen to see how they would like to wear their hair, part, bangs, layers, etc. Your help to personalize the system makes it feel like their own hair and renews their sense of self.
- Complete and return **the approval/acceptance form to our office immediately following the appointment.**
